Summary

Computer Science undergraduate (Expected 2026) with strong fundamentals in C++ programming, data structures, and algorithms. Experienced in building software systems with a focus on performance, clean architecture, and problem-solving. Actively learning system-level development and Linux-based environments while applying engineering best practices through real-world projects.

Skills

Frontend: HTML5, CSS3, JavaScript, React.js, Next.js, Tailwind CSS, GSAP, Three.js

Backend: Node.js, Express.js, RESTful APIs, Authentication

Databases: MongoDB, MySQL

Languages: C, C++, JavaScript, TypeScript

CS Fundamentals: Data Structures and Algorithms, Problem Solving

Tools: Git, GitHub, Postman, VS Code

Projects

Atmos 3D Interactive Experience | *Three.js, React Three Fiber (R3F), GSAP*

- Built an immersive 3D web experience using React Three Fiber with real-time camera movement and scene interactions.
- Implemented animated transitions, scroll-based interactions, and motion paths using GSAP.
- Worked with lights, models, shaders, and performance optimization techniques for smooth rendering.
- Focused on clean scene architecture, component reusability, and frame-rate optimization.

Devflow – Full Stack Web Application | *Next.js, React, Node.js, MongoDB*

- Built a full-stack application using **Next.js** with server-side rendering and API routes for scalable feature development.
- Designed and implemented reusable UI components, including tag-based badges and modular cards, following component-driven architecture.
- Developed backend logic using API routes for authentication, data handling, and CRUD operations with MongoDB.
- Followed Agile development practices, iterating features daily and maintaining version control using Git and GitHub.

Car Rental Web Application | *React, Node.js, Express, MongoDB*

- Developed a full-stack car rental platform with dynamic vehicle search, booking workflow, and responsive UI.
- Built reusable React components and integrated RESTful APIs for bookings, authentication, and user management.
- Implemented backend business logic, validation, and database operations using MongoDB and Express.js.
- Optimized frontend performance and ensured cross-browser compatibility.

Achievements

- Solved 200+ Data Structures and Algorithms problems using C++ on platforms like LeetCode.
- Built and publicly showcased WebGL-based 3D content, achieving **50,000 impressions** across developer platforms and social media.
- Actively participating in an **ongoing 100 Days of Coding Challenge**, consistently building and sharing projects focused on graphics, performance, and system-level understanding.
- Contributed to open-source projects by improving documentation, refactoring components, and submitting feature-focused pull requests, gaining hands-on experience with collaborative development and code reviews.
- First Prize – College Esports Tournament (2024).

Education

Bachelor of Technology – Computer Science

Chandigarh Group of Colleges, Mohali

2022 – 2026 (Expected)

CGPA: 7.2 / 10
